

is secreted into the medium.--

E/S
Concluded
--96 The method of claim ~~53~~⁸⁷ wherein the host cell is a gram negative bacterium and the heavy or light chain is secreted into the periplasmic space of the host cell bacterium.--

J
--97 The method of claim ~~53~~⁸⁷ further comprising recovering both heavy and light chain and reconstituting light chain and heavy chain to form an immunoglobulin having specific affinity for a particular known antigen.--

J
--98 The insoluble particles of heavy chain, light chain or Fab region produced by the method of claim ~~53~~⁹³.--

--99 A replicable expression vector comprising DNA operably linked to a promoter compatible with a suitable procaryotic or eukaryotic microbial host cell, said DNA consisting essentially of DNA encoding an immunoglobulin heavy chain, light chain or Fab region having specificity for a particular known antigen.--

J
--100 ⁹⁹ Recombinant host cells transformed with the vector of claim ~~56~~.--

Remarks

The basis for new claims 87 to 100 is originally submitted claims 53 - 65 and 67, which have been cancelled.

An action on the merits is solicited.

Respectfully submitted,

Janet E. Hasak
